TRANSACTION WORKFLOWS & LEDGER MAPPING

When each transaction hits the books, and which ledgers it moves

Ten workflows from the showroom POS, parts counter, workshop, imports, payroll and month-end close. Each step is marked as posting or non-posting, and every posting shows its debit and credit ledgers using the 7-digit codes from the ERP Master Chart of Accounts.

CLIENT GT Automotive Inc.	DOCUMENT ERP posting design
VERSION 1.0	DATE 08-Oct-2026
CURRENCY GYD (G$); USD / EUR suppliers	CHART OF ACCOUNTS ERP Master COA v1.0
SOURCE QuickBooks Online (live)	PREPARED BY Phanindra & Associates

HOW TO READ THE FLOWCHARTS

- Step that posts to the general ledger
- Step with no ledger impact (quote, order, PO, job card)
- Exception or alternative path
- Ledger lines for that step: **Dr** first, **Cr** indented

Codes ending in `xx` are resolved from the item, brand or tender on the document (for example `40101xx` = the vehicle-sales ledger of the model sold).

When does a transaction hit the books?

The ERP posts from source documents, not from manual journals. Pipeline documents (quotes, orders, POs, job cards) never post. A vehicle sale touches the books four times: deposit, banking, delivery invoice and balance receipt.

OPEN POINTS TO CONFIRM WITH GT AUTOMOTIVE

#	TOPIC	QUESTION / RECOMMENDATION
1	**VAT on customer deposits**	QB books deposits gross to Customer Deposits with no VAT. Confirm with the tax adviser whether VAT is due when an advance is received; if yes, VS-03 adds Cr 2030102 for the VAT portion and VS-06 reverses it.
2	**Duty-free / remission sales**	Confirm the VAT and duty treatment and the document trail (remission order, exemption certificate) for each duty-free category so tax code DF is applied correctly.
3	**Registration fees**	QB treats registration and fitness as cost of sale (on-the-road price). Confirm none are recharged to customers separately; if they are, add a recoverable ledger.
4	**POS posting granularity**	Choose real-time GL postings per receipt or one summarised journal per shift and tender. The sub-ledger keeps every receipt either way.
5	**Landed-cost allocation basis**	Choose allocation by FOB value or by unit within a shipment, and whether estimated costs are accrued at GRN (2010203) or posted only on actual bills.
6	**Stock in clearing**	QB shows G$5.57bn in Inventory Clearing (incl. G$189.6m BMW with no BMW stock account) against G$396m of vehicle and parts stock. Clear it shipment by shipment before cut-over.
7	**Opening Balance Equity**	G$648.0m to be reclassified to share capital, retained earnings or shareholder loans from the incorporation records.
8	**Bank balance**	DBL 321 shows a G$1.18bn credit in QB. Confirm overdraft vs unrecorded deposits / un-cleared items before loading the opening balance.
